AUBURN, ALABAMA

With Transfers Pacing Increase—

Fall Enrollment Again Moves To New Record

WELCOME BACK—These five candidates for title of Miss Homecoming pose for a pre-election picture. From the left they are Milla McCord, Gunterville; Donna Parker, Titusville, Fla.; Kay Ivey, Camden; Jane McKenzie, Eufaula; Kay Moss,

Dothan. Classes of 1916 and 1926 will be holding reunion during the weekend to be highlighted by the October 22 game with TCU. The homecoming clash will mark the first time Auburn and Texas Christian University have met on the gridiron.

Three Changes Adopted—

University Modifies Admission Policies

by John Galt '67

Auburn University has made three modifications in admission policies, effective at once. The new policies were adopted following the early-October report of a special study

committee appointed by President Harry M. Philpott. Modified are Auburns policies on fall admission of out-of-state girls, on out-of-region applicants, and on applications by high school juniors.

Herbert N. Hawkins, director of admissions, pointed out that these changes do not affect the basic criteria of admission. These considerations include a preference given to children of alumni and Alabama residents; overall high grade average; and minimum score requirements on the American College Test (ACT) or Scholastic Aptitude Test (SAT). Out-of-state freshman girls no longer are required to enroll for the summer quarter to insure housing for the fall quarter. The requirement has worked against attendance by out-of-state girls with good high school records and a preference for Auburn.

Previously only students from SREB states (states associated with the Southern Regional Education Board) were considered for admission. The new ruling allows admission of some students outside these 16 Southern states if they meet scholastic requirements considerably above those for Alabama students.

A third change permits the tentative acceptance of appli-

cants on the basis of ACT or SAT scores and grades during their junior year of high school. Until now high school students could not apply until they were in their senior year. Students now may be accepted on their 11th grade work, subject to maintaining satisfactory averages in the senior year.

Alabama students must have at least 12 high school credits, an overall "C" average and an ACT score of 18. With an increasing number of applicants scoring well above 18, such an ACT score does not guarantee admission. Out-of-state applicants must meet higher requirements, and out-of-region students must have a "B" average in high school and an ACT score of 25, or the comparable SAT score of 1,200.

The President's Office now determines the number of new students who may be admitted consistent with the institution's ability to provide proper instruction. The Admissions Office then complies with this number in accepting freshmen and transfer students. Of this quota a small percentage is allowed for out-of-state students. Remaining in effect is the policy of preference for

New Unit Set Up For Co-op Program

Establishment of the Office of Cooperative Education under Engineering Extension Service at Auburn University and the appointment of Frank Vandegrift as its director was announced here in early October by President Harry M. Philpott.

Cooperative Education acts in liaison with some 100 industries employing, on a systematic basis, more than 550 Auburn students. Under the Co-op program, which dates to 1937, students alternate quarters of campus classes with on-the-job work experience.

At the same time it was announced that Jack Westberry, assistant professor of textile engineering, will serve as assistant to Vandegrift. Dividing his duties between the office and teaching for the balance of the fall quarter, Westberry will work full-time with the Co-op program after January 1.

Vandegrift has served as assistant director of Engineering Extension since 1964. He will continue to assist in this capacity in his new position. A native of Birmingham, Vandegrift holds the B.S.M.E. from Georgia Tech and the M.A. from Columbia Theological Seminary.

Westberry, who also joined the Auburn faculty in 1964, holds the

(Continued on next page)

Lines were long and feet tired as Auburn's largest enrollment—12,334—went through the registration process in late September. More transfer students than were expected

—92 per cent of those admitted—caused some last-minute revisions in class sections and meant that some transfer students had to continue registration into an extra day.

For the first time in Auburn history the highest enrollment increase has been in transfer students which increased 61 per cent over 1965, a trend which Auburn anticipates will continue in coming years. At the same time freshmen enrollment dropped slightly, in line with experience at other colleges across the nation.

Graduate Enrollment Up

Registrar Albert Killian estimates off-campus field lab registration will push enrollment past 12,500. On campus are 11,310 undergraduates and 1,024 graduate students—showing a major growth in the graduate enrollment which was 923 in 1965. Last years' on-campus undergraduates numbered 10,930. To partially meet this four per cent increase over 1965, 17 new faculty positions have been added.

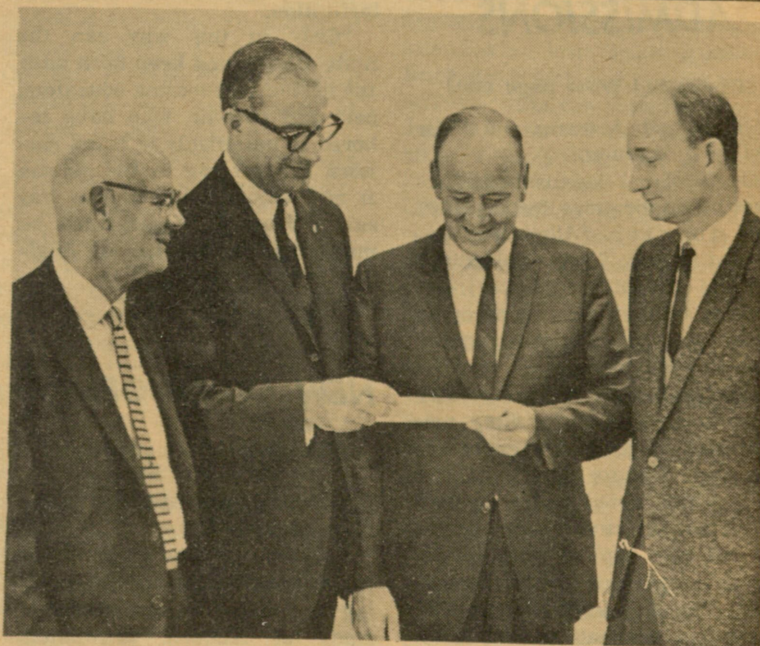

again showing the largest increase, now total 3,449 while freshman complete the totals with 3,863, a drop from 4,061 of last fall. (According to Dr. Wilbur Tincher, Director of the Educational Services Division which includes the Office of Registrar, this decrease reflects a national trend and also may be influenced locally by last-minute decisions to stay near home at the local junior colleges. The decrease also reflects an increase—as based on prior experience—in number of freshmen admitted who did not enroll.)

Many special and unclassified students have begun working toward a degree, reducing their numbers from 245 to 131.

Science & Literature Leads

The School of Science and Literature continues to be the largest school on campus, maintaining its more than 3,000 enrollment for the second straight year. It is the only Auburn school to reach that number except the School of Engineering during its peak years of 1956-57.

Enrollment by schools shows Veterinary Medicine, 375 (last year 333); Home Economics, 356 (342); Pharmacy, 405 (384); Chemistry, 375 (391); Agriculture, 863 (804); Architecture and The Arts, 863 (870); Engineering, 2,815 (2,782); Education, 2,781 (2,834); and Science and Literature, 3,480 (3,311).

US STEEL AIDS AUBURN—The United States Steel Foundation recently gave Auburn University \$7,800 for a two-year fellowship in Civil Engineering and support funds. Earl Mallick (second from left), Vice President—South, presents his company's check to President Philpott. Interested spectators are Dean of Engineering Fred Pumphrey, extreme left, and Dr. Donald A. Sawyer (extreme right), head of the Department of Civil Engineering here.

Vol-War Eagle Week: Challenge And Recognition

Weaver Proposes Engineering Center

To guarantee for the remainder of the century the "tremendous service" for which it has become famous, Auburn should build a multi-million dollar engineering center. Dean Charles H. Weaver of the University of Tennessee's College of Engineering advanced this proposal in companion speeches to Birmingham Jaycees and Rotarians during that city's observance of Vol-War Eagle Week, Sept. 19-24.

A "Glaring Difference"

Lack of such a center, Weaver declared, is the "glaring difference" he finds in comparing Auburn and Tennessee or most other land-grant institutions. The former Auburn department head emphasized that such a center should not come at the expense of other areas of instruction but was essential to continuation of the balanced growth Auburn has sought over the past decade.

Early in his speech to the Jaycees, Weaver viewed strides being made at Tennessee, giving special attention to the Space Institute at Tullahoma. He cited staff acquisition, programs with industry, off-campus programs in graduate and undergraduate centers through the state, and Tennessee's Dougherty Hall, "our new two million dollar engineering center which presents to the rapidly expanding faculty of the College of Engineering concrete proof of the total, enthusiastic support of the State of Tennessee and the administration of the University for its mission."

No Greater Progress

"It is my considered opinion that nowhere in this country has engineering education made more rapid strides than at Auburn University during the past decade. And this leads me to a proposal which I would be less than honest with both myself and my former colleagues at Auburn University if I did not make, and one that is based on one glaring difference in a comparison between the present situation at

Weaver

Editor's note: Charles H. Weaver joined the Auburn faculty in 1959. He served as Westinghouse Professor of Electrical Engineering and from 1963 as head of the Department of Electrical Engineering. In 1965 he returned to his alma mater, the University of Tennessee, to become dean of its College of Engineering.

* * *

Auburn and the present situation at the University of Tennessee (or most of the other forty-odd land-grant universities).

"A Declaration of Faith"

"This proposal is that immediate steps be taken to establish at Auburn an engineering center comparable to those now existing throughout the land-grant community, and also comparable to both the excellent Physical Science Center now existing there and the much-needed Liberal Arts-Education Center, which I understand is to be constructed there in the near future. My justification for suggesting such a center is simply this: a material declaration of faith in engineering education, without strings, is desperately needed at Auburn today. Only by such a move can the State of Alabama demonstrate to the engineering alumni of Auburn University, the engineering faculty of Auburn University, the host of industries who vie for the engineering graduates of Auburn University, and the engineering community of the country as a whole, its appreciation of the tremendous services that have been rendered through the years by this great institution.

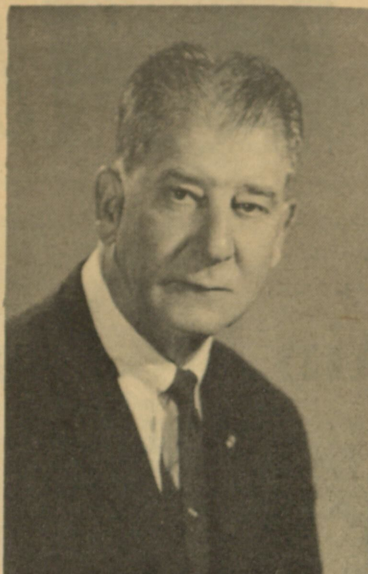

"Only in this way can the State of Alabama keep faith with the host of engineering educators, past and present, who have labored so unselfishly to bring Auburn Engineering to the stature it now enjoys. Only in this way can a reasonable guarantee be made that the College of Engi-

NEW CO-OP OFFICE

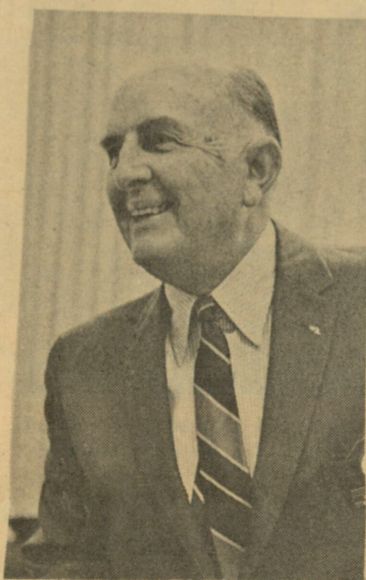

(Continued from page one)

B.S. and M.S. degrees from Georgia Tech.

Cooperative Education is offered in all courses of engineering as well as in other areas of study at Auburn. Enrollment under the work-study plan has more than doubled during the past four years. Continuing education programs developed through Engineering Extension have shown a similar increase.

Alvin A. Biggio

William L. Sims, II

neering of Auburn University will continue to render in the last half of the Twentieth Century the tremendous service to both the State and the Nation for which it became world famous during the first of the Twentieth Century. If I might paraphrase the words of the Governor under whom your educational system has made such great progress, the time has come "to stand up for engineering education at Auburn." In my opinion, anything less would be a tacit admission that first-class engineering education is not to be maintained at Auburn and that previous accomplishments will never again be equaled. I assure you that if such is the case, I will be well up toward the front of the line of deans seeking to hire portions of that excellent engineering faculty.

"I might add that a good approximate price tag for this center is four million dollars, and, as I shall attempt to point out in my speech to the Rotarians tomorrow, under no circumstance should this money be taken away from any other effort of that great institution."

Education courses for teachers were first offered at Auburn in 1909. In 1915 the Department of Education was created and was then reorganized as the School of Agricultural Education in 1918. In 1922 the School of Education was started.

Birmingham Honors Biggio, Sims

Two outstanding Auburn alumni, William L. Sims, II, '20 and Alvin A. Biggio '26 shared honors with two University of Tennessee alumni at a September 23 dinner sponsored by the Downtown Action Committee of Birmingham during celebration of Vol-War Eagle week.

Mr. Sims began a 33-year career with Colgate-Palmolive Co. as a salesman in Alabama during WW I. He became company president in 1955. Retiring in 1957 he took an active interest in the Florida citrus business he and his father had begun during Sims' years with Colgate-Palmolive.

Sims Heads AAG

Mr. Sims recently completed a two-year term on the Auburn Alumni Association Executive Committee and is a director of the Auburn University Foundation. This year he is chairman of the Auburn Annual Giving program.

A year after graduating from Auburn, Mr. Biggio joined Liberty National Life Insurance Co. and is now senior vice president. A trustee of the East End Hospital he is past official of both the Birmingham Kiwanis Club and the Quarterback Club.

A director of the Auburn Uni-

Biggio A Development Leader

versity Foundation, Mr. Biggio served as chairman of the Auburn University Development Fund and directed its first campaign in 1960-62.

The U-T alumni honored were Guy C. Youngerman and Coy M. Collingsworth. Mr. Youngerman operated Youngerman and Reynolds Lumber Co. in Montgomery until his retirement in 1951. President of the Alabama chapter of the University of Tennessee Alumni Association, Mr. Collingsworth is a general agent for Connecticut Mutual Life Insurance Co. in Birmingham.

Youse Publishes Fifth Math Text

Emory University Mathematician Bevin K. Youse '49, has just published his fifth book, a textbook *Algebra and the Elementary Functions*.

In addition to the topics of a usual text for integrated algebra and trigonometry, the book presents an elementary treatment of linear equations, determinants, and other pre-calculus topics.

The associate professor of mathematics has also written *The Number System, Mathematical Induction, Arithmetic, A Modern Approach*, and is co-author of *Solved Problems in Analytical Geometry and Calculus*.

Dickenson Publishing Co., Inc. published his latest text.

ADMISSIONS

(Continued from page one)

residents of Alabama and for children of alumni.

On October 1 Auburn began accepting applications for the 1967 fall quarter. (Admissions received almost 7,100 applications for the current fall quarter). Although students may be accepted until three weeks prior to a quarter, the university may advance the deadlines if necessary. Last year a December deadline was imposed on girls applicants and an April date for boys.

Hawkins noted that applications should have been received by all who applied prior to October 1, the date processing began. The Admissions Committee considers applications only after all credentials are received. Correspondence and requests for applications for admission should be addressed to Admissions Office, Martin Hall, Auburn University, Auburn, Ala., 36830.

A \$20,000 PROGRAM—Aerospace Professor W. G. Sherling '47 shows Head Professor Robert Pitts '32 (right) part of a computer program given to Auburn University by Pratt & Whitney. The company developed the program over a five-year period at an estimated man-hours cost of \$20,000. Students now will be able to obtain rapid, highly accurate evaluation of their designs—previously an impossibility. Ben Savin and Gordon Smith, executive officers of Pratt & Whitney's Florida Research Division, made the presentation to Sherling as he finished a second consecutive summer of work on advanced design projects for the company at West Palm Beach.

Campus Roundup

Opera Opens Five-Event Concert Series

The Goldovsky Opera Theater, which has been making musical history in the past 20 years with operas sung in "understandable English," opened the Auburn 1966-67 Concert Series on October 13. The company presented Verdi's "Rigoletto," one of the most universally-loved operas.

Four remaining concerts will be scattered throughout the school year with the American Folk Ballet coming October 26. This unique group is making its first transcontinental tour this fall under the direction of Miss Burch Mann. Completely American in spirit, style, and character, the company uses a dance form based on American folklore and history and supported on stage with music and literature.

On February 6, the great Spanish guitarist Carlos Montoya will perform a recital of his own arrangements and compositions in the Spanish Gypsy tradition.

Following on February 28 will be the Pittsburgh Symphony Orchestra, considered one of the six leading orchestras in the world, directed by Dr. William Steinburg.

Completing the series in April will be Alabama's own Nell Rankin, the Metropolitan's leading mezzo soprano, acclaimed as the "greatest Carmen of our time." Individual and season tickets are available for interested alumni from The Union Committee of the Concert and Lecture Series, Auburn University.

INDUSTRY WASTE WATER

Over the next two years Auburn University engineers with the cooperation of the textile industry will study waste water management practices in the industry. The project has been approved for support by the Office of Water Resources Research of the Department of Interior

through Alabama's Water Resources Research Institute at Auburn. Dr. Leo J. Hirth, associate professor of chemical engineering, will be principal investigator on the project aided by Professor James C. Farrow of textile engineering and Dr. Gerald Leigh, associate professor of civil engineering.

SANSKRIT WORD ORIGIN

Dr. Robert B. Skelton, head of the Department of Foreign Languages at Auburn, has established the origin of a word which has eluded Indian scholars for several generations. The word "attah" is from Sanskrit and means watchtower, balcony, raised platform or terrace. Attah also appears in Pali, the sacred language of Buddhism, establishing the word in that language around 1000 B.C. Dr. Skelton believes that his finding establishes the antiquity of commerce between India and Arabia and surmises that the word may have described a kind of pier used for diving by pearl fishermen.

NATIONAL PHARMACY WEEK

During National Pharmacy Week (October 2-8) in Alabama proclaimed by Governor Wallace, Auburn Pharmacy students presented a series of programs on drugs in high schools across the state. Members of the Auburn Chapter of the Alabama Pharmaceutical Association witnessing Governor Wallace's proclamation were Sherwood Thomas of Opelika, Marilyn Caine of Auburn, Betty Bailey of Sylacauga, and Durwood Cushing of Arab.

TUTORIAL ASSISTANCE

Struggling students in chemistry, mathematics, and physics who feel lost in large classes are finding there is help on the Auburn campus. Physics has inaugurated Saturday tutoring sessions for students having difficulty, along with special sessions held on Wednesday. The Wednesday sessions are for every beginning class in physics, and a senior professor spends an hour answering questions and working problems proposed by students. The Mathematics Department provides two graduate assistants to work with each of the seven auditorium sessions. They maintain office hours to help the students individually. In addition, the department keeps a list of persons available for special tutoring. In the Chemistry Department, instructors meet with students on off-days at regular class hours for help sessions.

BRITISH SCIENTIST VISITS

Dr. R. L. Wain, professor of agricultural chemistry at the University of London presented three lectures at Auburn during October. Dr. Wain discussed the chemical control of plant growth, agriculture and education in the developing countries, and developments in plant disease and weed control. He is in the U.S. as visiting professor at Cornell University and came to Auburn through the Visiting Scientist Program.

ROSS WINS ART AWARD

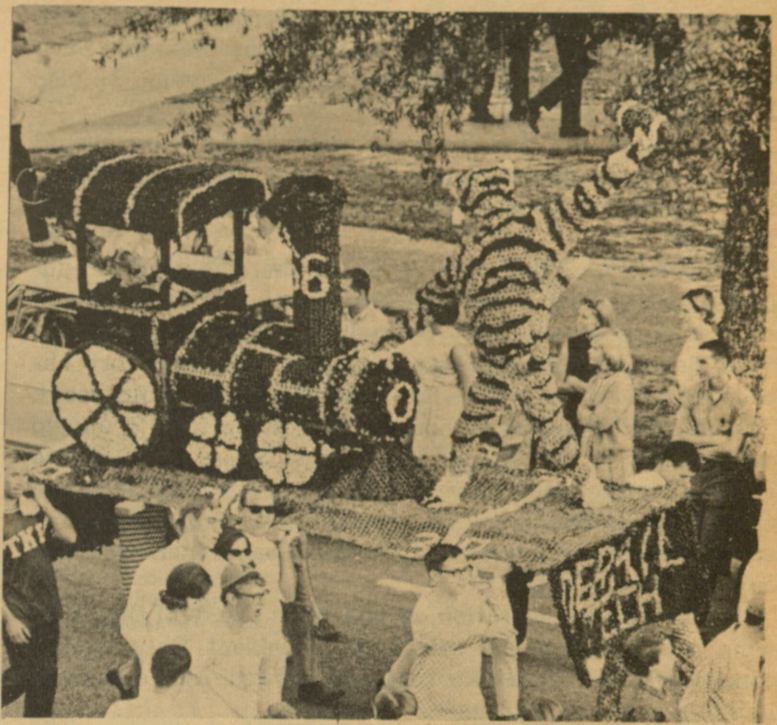

Conrad Ross, assistant professor of art, received a \$100 purchase award in the Jacksonville, Fla., Arts Festival IX for his print "Radio and Doll," a collage in-taglio work.

COMPUTER APPOINTEES

Dr. Leland H. Williams is the new director of the Auburn University Computer Center. Former professor at the University of Georgia and Duke, he came to Auburn from Florida State. In addition to teaching, Dr. Williams has worked as a mathematician in applied mathematics at Redstone Arsenal. Joining him as computer scientist is Dr. Donald Hartford. For the past five years, Dr. Hartford has specialized in data processing and programmed instruction for the Department of Educational Research at Florida State. Before entering the computer field, Dr. Hartford taught algebra and mathematics of finance at the University of Kentucky.

ENGLISH HOUR—The English Department has initiated a series of lectures by department members. Presented weekly, the lectures cover a variety of subjects in different English areas. Lectures already presented included a reading of an excerpt from a forthcoming novel by the author Madison Jones and a lecture on the "Metrical Uses of the Harp in Beowulf" by Dr. John Nist.

EE MASTER'S—The newly-issued Graduate School listing of "Abstracts of Theses and Titles of Dissertations 1964-1965" shows that the Electrical Engineering

WRECK TECH—In the annual Wreck Tech Pajama Parade competition the TKE fraternity took first prize with its "Derail Tech" float. The float depicts an Auburn tiger stopping the Tech yellow jacket engineered caboose.

At ROTC Summer Camp—

Cadets Take Top Honors

Auburn University Army ROTC cadets attending the annual summer camp at Fort Bragg, N.C., marched right into the top spot at the camp and shot down several camp records in the process as they won a resounding victory in competition with other colleges and universities.

The 92 Auburn cadets accounted for four of the "Best Cadets" in the camp's 10 companies, setting a record that has never been approached. None of the 40 other colleges at the camp had more than one "Best Cadet."

In addition, 41 of the cadets placed in the upper one-third of their respective platoons and 34 were in the middle third.

Then, insuring their top spot at the camp, 50 Auburn cadets were ranked in the "Expert" classification of rifle marksmanship and 37 in the "Sharpshooter" division.

The four top-ranking Auburn cadets were James D. Holley of Linden, Edward C. Joiner of Opelika, Truman M. Mayfield of Alexander City and James H. Morgan of Birmingham.

Joiner and Mayfield graduated at the end of the summer quarter and are on active duty with the U.S. Army. Holley is a senior in forestry and Morgan, a cadet colonel and bigade commander, is a senior in physical education.

Thirty-nine of the 92 Auburn

Department granted more Master's Degrees with thesis option (42) than any other department at Auburn. With a total of 15 Electrical Engineering Professor Martial A. Honnell directed more Master's theses than any other faculty member at Auburn during that period.

LINKLETTER TO LECTURE

Radio and television personality Art Linkletter will speak at Auburn on November 3 in the Union Ballroom.

CLUB NEWS

CHARLOTTE, N.C., AUBURN CLUB held a dinner meeting on September 1. Eighty-two people attended to hear guest speaker Buck Bradberry and to elect new officers. Outgoing president Jimmy L. Rosser '56 presided. New officers elected include: William C. (Wick) Watkins '56, president; Dr. John William McKee '41, vice president; and Mrs. Sally Harwell Heard '57, secretary-treasurer.

COOSA - TALLAPOOSA COUNTY AUBURN CLUB held its annual meeting at the Willow Point Golf and Country Club near Alexander City on September 14. Tom Jones, Auburn freshman football coach was guest speaker.

The **GREENWOOD, S.C., AUBURN CLUB** elected new officers at their August 12 meeting. Leading the club for 1966-67 are James W. Diamond '56, president; Lavelle Beach '51, vice president; and Charles A. Maddox '60, secretary-treasurer.

HALL OF HONOR—Two Alabama newspapermen, the late Julian O. Hall '22 and the late Oscar M. Dugger, Sr., were inducted into the Alabama Newspaper Hall of Honor on October 8. Representing Mr. Hall, former editor and publisher of the **Dothan Eagle** were, from left, Hudson Whitley; Mrs. Whitley (Delia Hall '57), his daughter; Mrs. Leon Harvard of Dothan, his sister; and Mr. Harvard. Mr. Dugger was editor and publisher of the **Andalusia Star**.

Contagious Enthusiasm?

By his own admission Dean Charles Weaver was putting his foot in his mouth when he proposed that Auburn construct a new multi-million dollar engineering center—a symbol of the state's determination to keep Auburn engineering education among the nation's leaders. Perhaps he was anticipating his Vols' victory and soothing our feelings! Such would not be in keeping. While thoroughly genial, he also is completely forthright.

Remember, too, that the boost which such a center would give to Auburn Engineering would also make it more attractive to some of the same faculty he would be seeking for his staff!

Weaver's remarks are a reminder that the pace of education, particularly in the sciences, is such that facilities and courses must continuously be updated. Since Engineering's dark days of a decade ago a unified Auburn effort has brought solid growth in faculty, enrollment and equipment. Thus, space is needed to house the growing faculty and to avoid arbitrary enrollment limitations. Space is needed to accommodate the trend toward more upper level and graduate enrollment as the junior colleges expand. Project-oriented education and continued emphasis on research increase space and equipment needs.

Auburn's administration, of course, is aware of the problems and studying the solutions. President Philpott has committed his efforts to a balanced growth, as the current building program affirms.

As well as reminding us of unfinished business in Engineering, Weaver's two speeches help to forestall any inclination "to grow weary in well-doing." Much remains to be done but Auburn is growing in stature toward a place among this country's ranking institutions. In a second Vol-War Eagle Week speech our former EE department head emphasized that the proposed facility should not come at the expense of other needs. In so doing he pointed out some of the superior programs that Auburn now has:

"... I do not want it (the engineering center) to be obtained at the expense of the School of Agriculture, quite often the whipping boy whenever loose talk is heard concerning present-day education. Our agricultural surpluses, like the missile crisis of 1960, have vanished, and the need for increased production of food and greater support of agricultural endeavors across the board exists as never before.

"I do not suggest that this be done at the expense of the School of Veterinary Medicine. That organization performs services extending far beyond the confines of Alabama, and numbers among its faculty professors who have obtained both national and international fame.

"The School of Architecture and the School of Pharmacy have brought national recognition to Auburn... their continued support is a must."

Thus one observer evaluates Auburn University—a timely reminder, we believe, that while we often must "run to hold our own," Auburn's aspirations to greater service are within our reach. No need to minimize either obstacles or potential!

Education Adds Up To . . .

National Education Week this year has as its theme "Education Adds Up . . ." with a particular value as the watchword for each day of the week. We were particularly pleased to note an emphasis on education for other than its "adding up" to economic competence, though this is the theme for Thursday. Tuesday education adds up to a creative spirit and Saturday, to lifelong opportunity.

All of this was brought to mind in completing the feature on Alumnus Lewis Vaughn in this issue. His hobby has grown far beyond the usual puttering in the garden. Habits of mental inquisitiveness, of patient study and testing of hypotheses—developed in his engineering studies—have given him a passport to the fascinating world of orchid breeding and culture.

Certainly, education should enhance one's ability to earn his way, but we believe long-run damage often is done to the cause of education by directly equating it with "x dollars more" in lifetime earnings. Its greatest value is the opportunity it affords us for fullest possible development of our potential to benefit the society in which we live as well as for self-realization. Rational thinking, logical analysis, scientific experimentation, critical judgement—these are the keys to life long opportunity in vocation or avocation which education should give us.

ONLY YESTERDAY

50 YEARS AGO — Auburn opened its twenty-fifth football season, in 1916, defeating Mercer 92-0.

It was estimated that between 50 and 100 boys were prevented from coming to Auburn by the enlistment of the National Guard. Despite this, the enrollment was 918, higher than ever before.

Auburn had three foreign students, representing the countries Brazil, China and Mexico. There were nine coeds in 1916.

25 YEARS AGO — In 1941 coed enrollment reached an all time high of 1,000. Unable to house all the applicants for enrollment, the college was forced to refund deposits to about 100 women who applied for entrance.

Practically all Freshmen were fingerprinted during orientation through a program inaugurated by Squires and Owls (Sophomore honoraries). The fingerprints provided positive identification and were filed with the State Patrol and FBI.

The student body was the largest in Auburn's history, yet the traffic regulations in Auburn were not growing with a corresponding rapidity. The Plainsman reported: "Where Mell Street intersects Thach Ave. has become exceedingly dangerous. Every hour of the day that corner is overrun with students and vehicles."

Irene Dunn and Robert Montgomery starred in "Unfinished Business" at the Martin Theatre. Seats were 15c during the day and 28c in the evening.

The opening of schools over the entire state was delayed because of the infantile paralysis epidemic. There were few definite facts known about the disease and its prevention.

The fall production of the Auburn Players was a comedy by Karol and Josef Copek "Adam the Creator."

A master plan of the Auburn of the future was placed on display in the lobby of Samford Hall.

The 1941 Senior project was to build a fish pool in the middle of Ross Square.

Building and Grounds paved approximately five miles of campus walks in September.

A new cuts policy allowed each student a quota of cuts for each course equal to the number of credit hours in the course.

PLAINSMAN WINS ALL-AMERICA RANK

For the first time in 21 years, The Auburn Plainsman, Auburn University's student newspaper, has been awarded an All-American rating in the National Newspaper Critical Service of Associated College Press.

This is the highest award that can be given to a college newspaper. Judging is on the three major fields of news coverage, style of writing, and technical make-up.

Editor Jerry Brown of Jackson received notice of the rating which cited The Plainsman for general coverage, creativity, style, and organization.

Here and There—

A Place For A Cliché

By Jerry Roden, '46

As Geoffrey Chaucer observed almost six hundred years ago, time-passes and fashions change in speech as well as dress. Expressions that once struck with the force of originality and the immediacy of revelation fade with usage into the limbo of *cliche* and are heard no more.

As an English major, I am presumably an arch foe of the *cliche* and the glittering generality. But the truth of the matter is that I cherish a number of trite old expressions as the most efficient vehicles for transporting nuggets of truth.

Roden

Recently I dropped one of those unsophisticated, time-worn gems like a bomb into the midst of what had been a congenial conversation: "After all," I said, "you still can't legislate morality."

Now, as those who have read this column for some time know, I am an incorrigible moderate—a devotee of my own version of the Aristotelian golden mean,

which Aristotle might, or might not, be willing to accept. But at any rate, my moderation makes me at moments welcome in circles both to the left and the right and at other moments an alien to all camps.

That little, dust-covered maxim was, of course, dropped in a circle to the left. It is, after all, primarily a warning to Utopian schemers, who usually are those with faith in progress and an inclination to believe in the perfectability of man. But I didn't bring that old-fashioned idea up just to act as a gadfly among liberal companions, and I don't repeat it here for the comfort of conservative friends.

What I want to say is: "A pox on both your houses." It's about time to recognize that legislation at the national level will not bring the consummation of a "social revolution" in this country and that by the same token state and local legislation will not stem the rising tide of discontent with some undesirable social conditions that have existed too long.

We have some real problems in Alabama and America that will not vanish with the application of a few drops of legislation here and there, followed by some vigorous wipes with an administrative cloth in either Washington or Montgomery.

The conflicts about these problems involve the clashing of opposing moralities; and in Alabama, the man caught in the middle is the professional public school man, who becomes a damnable sinner to one party or the other, and sometimes both, no matter what he does. The vanquished, in the final analysis, are likely to be the school children who fail to get the education that they should.

This column, then, becomes in effect an appeal to the conscience of liberals and conservatives alike to keep the politicians off the backs of educators. It is an appeal to dust off another old *cliche*. A short time ago we often heard Alabama educators speak of "a striving for excellence." Let's strike that old, time-worn note again and think of the schools not as political arenas but as places in which to learn the facts, the disciplines, and the indisputable moral truths that life demands.

'07 Dr. R. C. Williams has been honored by Georgia State College which has established the "R. C. Williams, M.D., Honor Award" for an outstanding graduate student in hospital administration. Dr. Williams was one of the persons who pioneered in establishing instruction in hospital administration at Georgia State in 1952.

'15 Dr. and Mrs. B. F. Thomas, Sr., of Auburn celebrated their fiftieth wedding anniversary on September 15. Dr. Thomas continues to practice medicine along with his son, Dr. B. F. Thomas, Jr., '40. The Thomases also have a daughter, Dr. Mary Olive Thomas, who is professor of English at Georgia State College.

'19 Dr. M. K. Heath, professor of small animal surgery and medicine in the Auburn School of Veterinary Medicine, has been reappointed to the State Board of Veterinary Medicine Examiners for a term expiring in 1971. Dr. Heath is secretary of the Board.

'20 Dr. Dana G. Sturkie has been named "Soil Conservationist of the Year" by the Alabama Wildlife Federation.

'21 Allen J. Wade, industry sales engineer for the systems sales and engineering operations of General Electric Co., retired on August 30 after 45 years of service.

'22 James Alexander Harrison can be reached at the Veterans Administration Center, Dormitory 2, Biloxi, Miss., 39531.

'23 Dewey C. Moore now makes his home at 508 Seegers St. in Andalusia.

'26 Geddes Self, principal of Walker County High in Jasper, has been honored by The Daily Mountain Eagle which dedicated its 1966 football issue to him. Listed in "Who's Who In Education," Mr. Self is in his 13th year as principal at Walker County High.

O. F. Wise, director of the division of rehabilitation and crippled children of the Alabama Department of Education, attended the 10th World Congress of the International Society for the Rehabilitation of the Disabled in Wiesbaden, Germany, on September 11-17.

John W. McElderry, vice president and Augusta Division manager of Atlanta Gas Light Co., recently completed his fortieth year with the company. Active in Augusta civic affairs, Mr. McElderry and his wife Moselle have three children, two sons and a daughter.

NEW ADDRESS: Dennis E. Hart, South Fort Mitchell, Ky.

'28 Howard L. Tabor is city engineer in Lawrenceburg, Tenn. He and his wife, Loretta and son Jimmy own and operate a large dairy and cattle farm at Pulaski, Tenn.

'30 NEW ADDRESSES: Lucius M. Dyal, Fernadina Beach, Fla.; John L. Wilson, Pawleys Island, S.C.; Lawrence N. Chamblee, Cape Canaveral, Fla.

'31 L. C. Lively has been named meter engineer in the General Meter Department of the Gulf Power Co. in Pensacola, Fla. He formerly worked in the General Operations Department.

NEW ADDRESSES: Col. W. W. Hill, Jr., Auburn; Miss Lucille M. Garrett, Lamonia, Iowa.

'32 Ruth Parkman, state field instructor, was awarded a plaque by the Louisiana Restaurant Association in appreciation for her many years of service as restaurant training specialist. Miss Parkman was recently transferred to the Home Economics Section to assist with their new wage earning programs.

Louise Whatley Taber, auditor in the occupancy section of the Housing Assistance Office, Region II of the Housing Assistance Administration in Philadelphia, Pa., has been awarded the Federal Government's 20-year service citation.

Ralph Jordan, Auburn head football coach, was surprised by the Buckhead (Ga.) Lions Club who presented him with a silver service at his 10th consecutive speaking appearance before the club. Coach Jordan has also been elected to the board of directors for Investors Fidelity Life Insurance Co. in Birmingham.

'34 R. S. Reaves is with the hydraulic development in the Farm Equipment Division of Allis-Chalmers.

William N. Sharp, Jr., executive director of the Opelika Chamber of Commerce, has celebrated his 20th year with the group. The local chamber presented him a silver bowl for his service.

Raymon T. Garlington of Tuscaloosa, has been appointed a vice president of Alabama Power Co. He will become Southeast Division vice president on November 1 with headquarters at Eufaula. He has been division manager at Tuscaloosa since 1963.

NEW ADDRESSES: Col. Tom L. Nash, Jr., Smyrna, Tenn.

'35 Fred A. Kummer was recently elected president of the Auburn Chapter of the National Society of Professional Engineers.

Parker M. Powell, Jr., has been appointed district manager of the St. Louis district by Deady Chemical Co. of Kansas City, specialists in water treatment for industrial boiler and cooling water. As district manager he will be in charge of sales and service in Alabama, Arkansas, Georgia, Kentucky, Louisiana, Mississippi, Tennessee, southern Illinois and eastern Missouri. He and his wife and two sons live in Edwardsville, Ill.

NEW ADDRESSES: Charles W. Hixon, Perote; Col. M. T. Martin, Jr., Arlington, Va.; Walter C. Smith, Charlotte, N.C.

'37 Hugh James Rodgers of Lanett has been named manager of industrial relations in the consumer products division of West Point-Pepperell, Inc.

Robert A. Morgan, Jr., is now an account executive with Edwards & Hanly, members of the New York and American Stock Exchanges in New York.

S. Robin Mullin, president of the Phenix-Girard Bank has been named "Boss of the Year" by the Phenix City American Business Women's Association.

'39 Gerald L. Leff is president of Leff Engineering Co. in New Orleans. The firm does air conditioning, heating and refrigeration contracting and engineering.

Lt. Col. Thomas W. Webb, Jr., recently returned from the Philippine Islands and is now assigned to the engineer division, DECSLOG Headquarters of the Third US Army at Ft. McPherson, Ga.

Ferdinand G. Frey has joined Boeing Aircraft at their Auburn plant just south of Seattle, Wash. He was formerly with Standard Oil's overseas affiliate, Lago Oil & Transport Co. in Aruba, Netherlands, Antilles.

M. D. Guthery, Auburn junior high basketball and football coach and chemistry instructor, has resigned to become supervisor of the State Chemical Laboratory here.

'40 Benjamin Clyde McCary, Jr., recently retired from the Air Force after 20 years of active duty. He joined the RCA Missile Test Project at Cape Kennedy as manager of the data processing requirements in the data processing organization.

Mrs. Ruth Lowe Brittin and her husband Dr. Norman Brittin are back in Auburn after living in Puerto Rico for several years. Dr. Brittin has rejoined the Auburn English department and Mrs. Brittin teaches in the English department at Tuskegee Institute.

NEW ADDRESSES: Cdr. Edward S. Buchanan, Indian Harbour Beach, Fla.; Thomas C. Payne, Mobile; Joel F. Clement, Garland, Tex.

'41 W. O. Crawford is president of Southern United Life Insurance Co. of Montgomery. He is vice president of the National Association of Life Insurance Companies. An avid horse fan, he owns and operates a horse ranch and participates in quarter horse shows as both an exhibitor and a judge.

Col. Abb Chrietberg began new duties at Ft. McPherson, Ga. on September 1.

'42 Charles A. Flowers has been promoted to manager of residential sales for Alabama Power Co. He has been assistant manager of residential sales at the company's general office in Birmingham.

Dr. Henry P. Orr, professor of horticulture at Auburn, is one of 50 experts quoted in a state-by-state planting guide of amateur rose growers in the new book, *The Magic World of Roses*.

'43 Ernest Merrill Yohn, Jr., has been honored by Pan American World Airways celebrating his 20th year with the company. He is superintendent of facilities at the Pan Am base

Davis

Hanson

Neil Davis '35 editor of the Lee County Bulletin, has been appointed by President Johnson to a national advisory commission on the problems of rural poverty. The commission will assist a presidential committee in appraising existing activities designed to achieve for the rural population opportunities available to other segments of the population.

A. T. Hanson '36 of Fairfax has been elected vice president in charge of human relations for W. C. Bradley Co. of Columbus, Ga.

in Miami. His wife is Marie Pace '45.

NEW ADDRESS: Lt. Col. Lewis C. Mayo, Jr., Destin, Fla.

'44 Elinor Bell McClure and her husband Dr. Warren McClure live in Kokomo, Ind. where he practices medicine. The McClures have three children, two boys and a girl.

'45 Edwin R. Rencher, Jr., is with Chemstrand Corp. at their main office in Charlotte, N.C.

'46 Henry Amerson, Montgomery radio executive, has been promoted to executive vice president and general manager of WCOV Radio and Tele-

LEGION OF MERIT—Retired Army Col. Kenneth G. Taylor '34 recently received the Legion of Merit, the second highest military honor, in the office of Auburn President Philpott. Col. Robert B. Marshall, right, Auburn ROTC commandant presented the award to Col. Taylor. Looking on

is Mrs. Taylor, the former Elizabeth Fletcher '37. Col. Taylor received the award for exceptional service from 1957-1966 as assistant executive officer and later chief of the Far East-Pacific Division of the Army office of International Affairs. Since retiring in June, Col. Taylor lives in Auburn.

Career Spans Half Century

When Judson Gillespie '23 retired as manager of contract construction for Gulf Power Co. on August 1, he ended a career covering almost half a century of electrical engineer-

ing construction. He can look back over an era that has spanned the time from mule-power to helicopter methods of power line construction.

Recently Mr. Gillespie was involved in erecting the 115-KV high-voltage line from Gulf Power's Crist Steam Plant across swampy terrain near the mouth of the Escambia River to American Cyanamid's Creslan Plant. In this project a helicopter transported the towers and placed them in position.

He was also in the thick of things when the company built an earlier parallel line in the same area under more difficult circumstances. Then, canals were dug, equipment brought in by barge, and large, heavy pilings driven into the muckland—a much slower process than the helicopter airlift of aluminum transmission towers.

Steel guy cables holding the aluminum transmission towers upright are the key to their strength. Cables are anchored to multi-helix steel anchors driven as deep as 70-80 feet into the muck. The new aluminum tower

system is designed to withstand 150-mile-per-hour hurricane blasts.

Line building 40 years ago when Mr. Gillespie was with Alabama Power Co. was something else again. In those days, line construction sites resembled small army camps. The crews would "follow the lines with tents, bedrolls, cots, and cooking paraphernalia. We would build a line three miles each way from the campsite, then move on with our mules and wagons to new conquests."

In the early years following graduation from Auburn, the Boaz native was instrumental in construction of hundreds of miles of transmission lines in Alabama, as well as many more miles of rural distribution lines years before TVA and REA came into existence.

The veteran engineer said that the out-of-door life he has led in his 43-year engineering career is just what has suited him. "I've enjoyed my work all these years, and if I had it to do over again, I'd probably do the same thing

JUDSON GILLESPIE . . . retires

in the same line of work. I think I've been extremely lucky in my lifetime—and I won't get bored in retirement, though I'll have to adjust to a slower pace."

Now that he won't be involved in electrical construction every day, Mr. Gillespie plans to do a little fishing, and some of those undone things he's put off through the years, but he'll spend most of his time tinkering with a voice-communications and telegraph wireless center in his home. He plans to build a portable wireless rig for field-sending and receiving as he travels around.

"I'm in the midst of a good life," the spry engineer said. "I've always tried to stay happy—and usually succeeded. You won't last if you don't do that."

John M. McCraney has been promoted to division manager of Wilson & Toomer Fertilizer Co. of Jacksonville, Fla., with offices in Cottondale, Fla.

Joseph H. Appleton, professor of civil engineering at the University of Alabama lectured October 3 in Birmingham in the American Institute of Steel Construction's series "Space Forms in Steel."

Maj. Elro M. Swindle, Jr., is now stationed at Naha, Okinawa, where he is a C-130 pilot in the 41st Troop Carrier Squadron.

John B. Jones, Jr., of Shawmut has been named manager of Shawmut Mill No. 1 in the apparel fabrics division of West Point-Pepperell, Inc.

Jerre L. Pearson, president of Southern Frozen Foods, Inc. of Montezuma, Ga., has been elected president and chief executive officer of Seeman Brothers, Inc. and its subsidiary, Seabrook Farms Co., Inc. He has moved to Seeman's headquarters in Carlstadt, N.J., but continues as president of Southern.

ALUMNALITIES—Continued

vision. He will also serve on the firm's board of directors.

'47 James W. Mills, Jr., has been named president and chief executive officer of Lawyers Title of Louisiana, Inc.

John B. Clopton is participating in the 50th session of the Advanced Management Program of the Harvard University Graduate School of Business Administration. His classmates are 160 U.S. and foreign business executives and government officials.

AU RECEIVES MONSANTO AWARD—A check in the amount of \$1,000 was presented by Monsanto Chemical Corp. to Auburn University President Harry M. Philpott by Walter Smith '48, plant engineer for the Monsanto Textiles Division at Decatur. At the presentation were from left, Dean

Charles R. Saunders '23, School of Chemistry, Smith, Dr. Philpott, and R. E. Wingard '33, head of chemical engineering. The funds are divided between the Department of Chemical Engineering and the student receiving the Monsanto scholarship.

Japanese Honor W. H. Horns

Governor Katsuya Sato of Nagasaki Prefecture, Japan, has cited Auburn alumni Mr. and Mrs. William Horn '56 (Sylvia McCalla '55) for their voluntary services to unfortunate children in Nagasaki.

The Horns, who now have been reassigned to Yokohama, came to Nagasaki, in April, 1963, when Bill, a shipping engineer, was assigned to the Nagasaki Shipyards. Soon after they arrived, Mrs. Horn became active in the "movement of love" initiated by another American couple. The movement revolved around a voluntary service group known as "Usagi Kai" which was founded by Dr. and Mrs. Sagan of the Atomic Bomb Casualties Commission in Nagasaki.

As president of the group, Mrs. Horn spent much of her time helping the children. Members of the organization collected money for the children's toys and cakes at Christmas and they visited the institutions often to help and entertain the inmates.

Learning of their work, members of the American Embassy Wives Club in Tokyo and the Officers' Wives Club at Sasebo

Naval Base cooperated by helping and visiting the different institutions.

The "Usagi Kai" has grown into a membership of about 500, and their activities have gained public recognition. Last year Governor Sato honored the "Usagi Kai" with a unit citation.

Prior to Bill's reassignment the Horns presented a very elaborate "racing car" set to the inmates of the Kaisei Gakuen institution. This, plus Mrs. Horn's day-to-day voluntary services were so deeply appreciated that Governor Sato singled out Sylvia and Bill for an individual citation, which is quite a rarity. The citation reads: "I am honored to present you with a letter of thanks and a small gift in appreciation of your great contribution to the children's welfare program in this prefecture." The gift is a beautiful vase scrolled in gold.

MARRIED: Wanda Baker Hungerford to Homer Wright, Jr., in Birmingham on August 27. They are at home in Auburn.

'48 Billy Lebold Harbert is one of 160 U.S. and foreign business executives and government officials attending an Advanced Management Program of the Harvard University Graduate School of Business Administration.

Guy B. Cofield, first assistant manager of purchases for Alabama Power Co., has been named purchasing manager.

Dr. John Thomas, Jr., assistant professor of religion at Mobile Baptist College and chairman of the Humanities Division, was guest speaker at the Cloverdale Baptist Church in Montgomery recently.

'49 John B. Charlton, manager of control and administration for the Mexico City office of Monsanto International Engineering, transferred to London, England, as manager of control and administration for the offices in London and Brussels. Mr. Charlton and his wife, Vennetta Cox '49, have a 16-year-old daughter, Carol.

George P. Williams has transferred to the Belk Stores Services Office at Charlotte, N.C., where he is a buyer. He and his wife have three children: Paul, Margaret, and Laura.

Edward Earl Andrews is with Southern Bell in Atlanta.

Maj. Chapin R. Sammons was recently promoted to lieutenant colonel at Headquarters of the Defense Supply Agency in Atlanta where he is executive to the director. He and his wife Betty have three sons—Stanley, Danny, and Jeffrey.

Lamar Hartzog is now dealer development manager for the International Harvester district office at Little Rock, Ark.

Robert B. Ingram, veteran Montgomery Advertiser political writer, resigned September 10 to accept an executive position with

the Medical Association of Alabama. He and Mrs. Ingram have three children, Burr, 13, Beth, 11, and Ragan, 2½.

Wesley Ellis has written and produced a hit new musical for children at the Pixie Playhouse in Mobile, entitled "The Bremen-Town Musicians."

BORN: A daughter, Nancy Lynn, to Mr. and Mrs. Carl Sikes of Luverne on August 28.

'50 George H. Wright, Jr., and Andrew J. Gentry, Jr., have formed a law firm in Auburn. Senior partner of the firm, Mr. Wright serves as county solicitor of Lee County and is unopposed as the Democratic nominee for re-election in the November general election.

John H. Warlick, Jr., is vice president and general manager of Turbo Systems, Inc.'s new air-

Rogers

McCarty

B. Samuel Rogers '38, president of Attwood & Rogers Professional Pharmacists, Inc., of Jacksonville, Fla., was on campus early in October to address the student chapter of the American Pharmaceutical Association. A past president and past chairman of the Board of American College of Apothecaries, Mr. Rogers is now chairman of its judicial council and a member of the pharmacy advisory panel of Smith, Kline & French Laboratories.

F. C. McCarty '42 manager of the Atlanta District of the Philip Carey Mfg. Co., has received the President's Trophy as top sales district in the company.

Alumnus Heads Orchid Society

by Fowler Dugger, Jr.

Add one more honor to the long list of achievements of Auburn alumni: presidency of the American Orchid Society. Not too surprising for an institution with a horticulture

department? Unique aspect of this honor, however, is the fact that it was earned by a graduate in electrical engineering, Lewis Candler Vaughn.

Mr. Vaughn, a member of the Class of 1919, this month completed his second term as president of the 10,000-member American Orchid Society. Founded in 1921, the Society now can count more than 200 affiliated societies, including a number in other countries. News of Mr. Vaughn's election came to the alumni office through Dr. Wyly Billing '16, himself an orchid fancier (member of the American Society's research committee and vice president of the South Florida Society). Thus, a late August weekend vacation in the West Palm Beach area provided an opportunity to satisfy my curiosity about this engineering alumnus turned horticulturist.

Vaughns Are Editors

We were received in an office wing of the Vaughn home, space probably made necessary by scope of the Vaughns involvement in orchids. For some years Mr. Vaughn has been an officer in the American Orchid Society and the South Florida Society. Together the Vaughns edit the bi-monthly magazine of the Florida group, *The Florida Orchidist*. Mrs. Vaughn, the former Varina Webb of Americus, Ga., now is chairman of the American Society's Committee on Affiliated Societies, one of the posts formerly held by her husband in his rise to the presidency.

A native of Conyers, Ga., Vaughn went with Westinghouse Electric's research division in Pittsburgh upon graduation. Among several patentable designs he developed there was the synchronous motor for the electric clock. But in 1925 a desire to re-

turn to the South coupled with an interest in the potential of a developing Florida prompted the young engineer to leave Westinghouse.

Sharing his interest in the Florida potential was classmate George R. Wright (now living in Indianapolis, Ind.). Thus in 1925 they formed Wright & Vaughn, Inc. and opened an automotive parts store in West Palm Beach. A disastrous storm in 1928 led Mr. Wright to withdraw, though the two classmates remain close friends. Mr. Vaughn's faith in Florida persevered through the cycles of the Twenties and Thirties. Today Vaughn & Wright has 10 wholesale outlets in the area, operating through associate corporations in Ft. Lauderdale, Ft. Pierce and West Palm Beach.

The combination of West Palm's climate and an interest in horticulture stemming from boyhood soon found Mr. Vaughn growing flowers, plants and trees that today overwhelm a visitor with their beauty and variety. In addition to acquiring other real estate for investment purposes, the Vaughns have added to the grounds around their home. They now have five acres—beautifully developed and virtually a botanical garden in its variety.

First Encounter

Thus the stage was set for Mr. Vaughn's encounter with orchids in the 1940's. Orchids, he explained, offer an infinite variety: an estimated 20,000 occur naturally and hybridization by man accounts for another 20 to 30,000. (I also learned in this all-too-brief visit that orchids grow all over the world except in polar regions and the great deserts. Only two or three orchids

are native to Hawaii, though many varieties now are grown there).

Here was an absorbing diversion from business interests, an outlet for his interest in experimentation and study that had been kindled in his electrical engineering pursuits. Mr. Vaughn became interested in a genus of orchid known as *Phalaenopsis*, or moth orchid. Grown earlier in Florida, it was then little used for cut flowers and held little interest for most hobbyists. By careful study and patient experimentation over a period of years he was able to produce the first true yellow in *Phalaenopsis* in 1957. (Other sources indicate Vaughn has played a prominent role in extending the color range of this genus).

Using his inventive talents, Mr. Vaughn also developed a cooling system for his greenhouses to expand the range of orchids he could grow in the southern Florida climate. Though expecting to see a greenhouse of some size, I was totally unprepared to walk from greenhouse to greenhouse. So engrossed in the scientific study and breeding of orchids has Mr. Vaughn become that he has a complex of greenhouses and slatwood houses for his orchids.

In one house row after row of test tubes and flasks and flats of seedlings introduced another aspect of the true orchid enthusiast. Mr. Vaughn grows many orchids from seed as well as by the more common method of propagation by cuttings. Seeds must be placed carefully in sterile test tubes in specially prepared cultures for, unlike other plants, no food is stored in the orchid seed. Then comes transplanting and careful nurture—an average of four years from "planting" of seed to the first bloom.

But as our host confessed, "Not everyone is smitten as hard as I. Orchid culture can be a rela-

HOBBY OR VOCATION?—Lewis C. Vaughn '19 admits to devoting much time to his hobby of orchids. Now a skilled horticulturist, he is shown with a favorite variety. In foreground is a page from one of earliest books on orchids, published in England in early 1800's.

tively simple, inexpensive hobby—certainly for the beginner."

Mr. Vaughn shares with his wife the feeling that challenging and stimulating as the hobby has been, perhaps the greatest reward has been in the friendships made in pursuit of the hobby. In April, for example, Mr. Vaughn was chairman of the Fifth World Orchid Conference held in Long Beach, Calif., attracting 1500 registrants from 32 countries. The event is held every three years since the first in 1954 in St. Louis, Mo.—in Hawaii, London, Singapore. The next will be in Sydney, Australia. Orchids thus provide a passport to shared interests and friendships wherever the Vaughns may travel.

Here in Mr. Vaughn's welcome to the Fifth Conference

may be the essence of what his hobby has meant to him:

"We know we have many problems yet to solve but, together, we are creating a climate in which we may look for and find solutions. In this endeavor, we may follow the example set by the orchid itself, which has, as it evolved, adapted into an infinitude of forms, spread over the world, and specialized until almost every plant seems to be a distinct form. Yet under the striking dissimilarities, we find a pattern that unites them all in one great family.

"Let us resolve, then, that the ultimate goal of this Conference—and of those to come—shall be to find . . . those common bonds of mutual interests, which, in the fullest sense, unite us all."

ALUMNALITIES—Continued

craft parts plant at South Connelville, Pa.

Marcus D. Moreman was promoted to lieutenant colonel on August 19. He is assigned to the Infantry Board at the U.S. Army Test and Evaluation Command at Ft. Benning, Ga. He and his wife Lucile have three children: Mark, 15, Michele, 11, and Bradford, 9.

Thomas E. Hurst has been promoted to regional supervisor of the domestic market of Chemstrand Division of Monsanto Co. in Charlotte, N.C.

T. Furman Cauthen is minister at the Silver Springs Church of Christ in Silver Springs, Md.

BORN: A son, Alan Brown, to Mr. and Mrs. Ernest M. Duffee (Betty Jean Brown) of Marianna, Fla., on November 22, 1965. Mr. Duffee is a soil scientist with the Soil Conservation Service and Mrs. Duffee teaches at Marianna High School.

'51 Roger P. Schad has been named a vice president of North Carolina National Bank. He recently resigned as assistant general auditor of the Federal Reserve Bank of Richmond to join NCNB.

Maj. John M. Lowry, USAF, has received the first oak leaf cluster to the Distinguished Flying Cross at the Armed Forces Staff College in Norfolk, Va., where he is a student.

Donald B. Lanford has moved to Atlanta as assistant regional manager with the Linde Division of Union Carbide Corp.

'52 Richard O'Barr is now a technical writer in the Technical Publications section of Chemstrand at Decatur. He and his wife have three children.

Robert C. Carter is now with General Electric in Gainesville, Fla.

AROUND THE WORLD WITH ORCHIDS—Mr. Vaughn's office walls display only a few of the many awards he has won as breeder and exhibitor of orchids in state, regional and international competition. Shown here are citations for his service

as president of American Orchid Society, co-editor of *Florida Orchidist*, and other leadership posts. In April he presided at the Fifth World Orchid Conference in Long Beach, California. A true yellow in one genus is among his accomplishments.

AIR MEDAL—1/Lt. Gene W. Quick, USAF, '63, recently received the Air Medal at Phan Rang AB, Vietnam. Presenting the medal is Col. George S. Weart, wing commander. Lt. Quick, an F-4C Phantom II pilot, was awarded the medal for meritorious achievement during military flights while assigned to Southeast Asia.

ALUMNALITIES—Continued

C. Dennon Alexander is with Reynolds Metals Co. in Hot Springs, Ark.

Maj. E. E. Jarvis has just returned from Vietnam where he received the Vietnam Service Medal and the Air Medal for more than 50 combat missions with SAC. He is now assigned to the AFROTC unit at the University of Georgia.

Tom Radney received the Democratic nomination for the Alabama Senate representing Elmore, Macon, and Tallapoosa Counties. He is married to **Mado-lyn Anderson** '61.

'53 Harry S. "Buddy" Roberts, Jr., vice president of Williams Lumber Co. was recently elected president of the Homebuilders Association of Columbus, Ga. He is married to **Betty Jackson** '54 and they have four children.

Milton K. Parson of Montgomery has joined Alabama Farm Bureau as Director of Public Affairs.

'54 James S. Johnston is an industrial engineer with Atlas Chemical Industries, Inc. in Joplin, Mo.

Evans S. Dorsey is new managing officer of the First Federal Savings and Loan Association of Lee County. He was previously vice president. He, his wife Nancy, and two children live in Opelika.

Charles C. Baskin has joined the Agronomy Department of Mississippi State University and is working toward a Ph.D. in seed technology.

Maj. A. D. Brown, Jr., received a Ph.D. in chemistry from Auburn on August 24. He is assigned to the Frank S. Seiler Research Laboratory at USAF Academy, Colo.

Dr. James E. Martin, professor of agricultural economics at Oklahoma State University, has been appointed head of the Department of Agricultural Economics at V.P.I. He and his wife, **Rachel Ann Freeman** '57, have three children—Michael, 7, William, 5, and Jill, 3.

MARRIED: Susan Nowlin Hare to **John Newsom Yauger** on October 8 in Selma.

BORN: A son, William Lawrence, Jr., to Mr. and Mrs. **William L. Brown (Flora Cason)** '59 of Hammond, La., on April 12... A daughter, Lori Joyce, to Dr. and Mrs. **Nicholas E. Botta (Joyce McNeal)** '55 of Auburn on August 17.

'55 Ray A. Robinson is enrolled in the Graduate School of Industrial Administration at Carnegie Institute of Technology.

Anthony P. Damiano is now with Sylvania Electric Corp. in Wheeling, W. Va.

Capt. Julius D. Oerting is a commander minute man of the Launch Control Center at Malmstrom AFB, Minn.

Dr. Austin C. Newman, Jr., has been named to the Auburn School of Veterinary Medicine as

Sims

Long

Mearlin L. Sims '43 has been appointed resident manager of FMC Corporation's Organic Chemicals Division plant in Nitro, W. Va. He and his wife **Johnnie** have a daughter **Jennie**.

Dr. Hugh M. Long '47 of Union Carbide's Linde Division in Tonawanda, N.Y., has been invited as an official delegate to the Tenth International Conference for Low Temperature Physics in Moscow. The conference is sponsored by the Academy of Science of the USSR and the International Union of Pure and Applied Physics.

In Memoriam — '92 Through '69

Jacob Thompson Bullen '92, died May 14, 1965, according to information received by the Alumni Association.

Miss Mattie Lucile Burton '99, partner in Auburn's oldest business, Burton's Book Store, died September 14. Miss Burton was a partner with her sister, Mrs. O. D. Langston, in the store, located across the street from the Auburn University campus. An Auburn landmark, the business has served University students more than half a century. It was founded in 1878 by her father, R. W. Burton, and his brother, J. O. Burton. "Miss Lucile" had been in failing health for some time but stopped going to the bookstore only in July. Miss Burton was a Trustee of the First Presbyterian Church and longtime treasurer of the Sunday school.

William R. Coleman, Sr., '04 of Birmingham died September 21 at a local hospital. He is survived by one son, W. R. Coleman, Jr., '31; one sister, Mrs. Annie Fennell, and one brother, Fred Coleman, both of Coquille, Ore.

Julius T. Pearson '09 died suddenly on March 15 at his home in North Miami Beach, Fla. He had been in an automobile accident in February and although not injured, suffered from prolonged shock. He was adjusting the license plate on his new car when he collapsed. He had a long career with Westinghouse Electric and Westinghouse Supply. During his recent years in Florida, he had represented Sierra Electric Corp., an electric lighting fixture concern. Surviving is his widow, Mrs. Dolly Pearson.

Roswell H. Richardson, Jr., '09 of Athens died March 29, 1963 according to recent information.

associate professor in large animal surgery and medicine.

MARRIED: Carol Joan Anderson to **John Hamilton Dorrell, Jr.**, on September 10 in Piedmont.

BORN: A son, William Lakin, to Dr. and Mrs. **Daniel M. Thomas (Marilakin K. Howard)** '54 of Forest, Miss., on May 10.

'56 Dr. Robert P. Shields has joined the Auburn School of Veterinary Medicine as an assistant professor in pathology and parasitology.

Capt. Paul W. Bannon is attending the Air Force Institute of Technology at Wright-Patterson AFB, Ohio, where he is working toward a master of science in systems management.

Lcdr. Buford A. Harris, Jr., is serving as ASW ordnance officer on Serulant staff in Norfolk, Va. **Carlton F. Whitman**, director of music at Palmetto (Fla.) High School is president-elect of the Manatee County Teachers Association. He and his wife have four sons—Lee, 6; Jay, 5; Del, 2; and Tod, 1.

Grady E. Lanier, D.V.M., has moved into his new building, The Culter Ridge Veterinary Clinic in Miami, Fla.

John I. Nixon, senior chemical engineer in lubricants research

James M. Flournoy '11 died in July, 1943, in Pensacola according to information received recently by the Alumni Office.

Clem Cleveland Faulk '15, well-known Samson merchant, died August 13 following a short illness. Survivors include his widow Mrs. Mary Stephenson Faulk, and two brothers, Roland, and Dr. A. L. Faulk '16 all of Sampson.

James T. High '15 died April 16, at Ft. Myers, Fla., and was buried in Arlington National Cemetery.

James S. Gaskell, Sr., '15 died September 7 in Montgomery after an extended illness. Survivors include his widow, Mrs. Rebe R. Gaskell; two sons, James, Jr., of Montgomery, and William T. of Birmingham.

James O. Avery '18 of Red Bay is deceased.

Richard Taylor Compton '18, D.V.M., of Thomaston died August 25 according to alumni office information.

Peter H. Harris '23 of Montgomery died August 9 after a brief illness. Survivors include his widow, Mrs. Bessie B. Harris, a brother and three sisters.

Dr. Radford M. Barnard '24 of Arab died April 19.

Ben Robertson Martin, Jr., '25 of Clayton died September 25 after an extended illness. Survivors include his widow, Mrs. Nell Gammell Martin; a son, Ben R. Martin '50; and two daughters, Mrs. A. B. Robertson, Jr., and Mrs. W. T. Scroggins all of Clayton.

David Newton Wright '26 died May 11, 1962, in Orlando, Fla., according to recent information.

Col. Walter L. Morrow '27 died September 10 in Birmingham. A Birmingham realtor, he was an Optimist Club member and a Shriner. He is survived by his widow; two daughters, Mrs. Jack Gibson and Mrs. Owen Crutcher; one sister, Mrs. Alton Markham; and two brothers, G. C. Morrow

'25 and Claude R. Morrow '46 of Athens.

Miss Mamie Park '34 is deceased according to alumni information.

Elmer Houston Kelley '34 of Camden died September 24. Survivors include his widow, Mrs. Sue Griffin Kelley; two daughters, Mrs. Kay Pruitt of Atlanta and Mrs. Susan Kelley of Columbus; and his mother, Mrs. J. R. Kelley of Evergreen.

Frank H. Ellis '38 died of a heart attack on September 14. He was an industrial engineer for U.S. Steel Corp. in Birmingham. During his years at Auburn he was a member of the "A" Club and on the Auburn varsity baseball and basketball teams. He also was an Auburn ROTC instructor from 1940-1942. Survivors include his widow, Mrs. Frances Winton Ellis; his mother, Mrs. Lula C. Ellis, of Lineville and a brother, Hugh W. Ellis of Gadsden.

Dr. John C. McNeil '38 died April 26 according to Alumni Office information.

Robert Ellis Watts '43 died at Emory University Hospital August 30 following a brief illness. A partner in Hohlweg, Watts and Associates, Consulting Engineers, Mr. Watts and his family were living in Tehran, Iran, when he came to the U.S. for hospital treatment. He is survived by his widow, Mrs. Jeanette Knapp Watts '43; four daughters, and one son.

Euclid G. Mayfield '48 died August 25 at Savannah, Ga.

Julous O. Carnell '49 died of leukemia October 28, 1965. Survivors include his widow and a daughter who is a senior at Auburn.

Mrs. Frances Scott Watson '52 (M.S.) of Columbus, Ga., died recently. She had taught in Moscoogee County for 39 years. Survivors include her husband, Edgar B. Watson; a daughter, Miss Frances Watson; and parents, Mr. and Mrs. Alton T. Scott, Sr.

Miss Elizabeth Rountree '65 died recently in Pensacola, Fla., of injuries suffered in a traffic accident. She taught at Ferry Pass Elementary School in Pensacola. Survivors include her parents, Mr. and Mrs. Robert M. Rountree, Jr., '26, of Selma; two sisters, Miss Estelle Rountree of Richmond, Va., and Mrs. Mattie Rountree Barr of Decatur, Ga.; and one brother, Robert M. Rountree, III.

Patrick Ladd Wheeler Sefton '69 of Huntsville was killed September 9 near Meridian, Miss., when his compact car ran beneath a trailer truck loaded with chickens. A junior in business administration, he was a member of Phi Delta Theta.

Jeffery Mitchell '69 of Montgomery died suddenly in Winter Garden, Fla., August 25. He was a freshman in business administration.

Curts Designs Raceway

Alumnus Jerry Curts' enthusiasm for sports cars and racing gave him the idea for his senior thesis design needed to meet requirements for his degree in architecture. That

idea was the design of a complete race course—perhaps the world's finest—to be located in the Memphis suburb of Whitehaven.

Although designing a racetrack is out of the ordinary for an architect, the thesis committee decided to let Jerry go ahead and plan the racecourse in total with restaurants, meeting rooms, and grandstands, presenting both typical and atypical architectural problems.

Eight months of work later, Jerry produced what Architecture Professor William McMinn calls an "exceptional job."

After graduating in June the Memphis boy joined the hometown firm of Wadlington & Marshall, which has assumed his racecourse project. Working steadily throughout the summer, the firm now has a formal plan, lacking only Memphis Park Commission approval, to utilize McKellar Park for the \$5 million home of what would become Memphis' greatest international attraction.

Funds for the proposed raceway complex will come from private sources, and, if approved, the square mile of McKellar Park to be used will be leased from the city.

In an article in the *Whitehaven Press*, Reporter Tommy McNamee says the highlight of Jerry's design is the race complex center where all concerns of the race are group together in a single architectural theme.

"Here a giant TV tower will give the press and television a commanding view of the entire three-mile circuit, and a timing tower will provide services for race officials. In this area there will be a large public cafeteria,

a refreshment center, a ballroom which could couple for community services such as club meetings, technical facilities for competitors, and administrative offices.

"Here also will be the pits and paddock. Pit provisions are made for 75 cars, with 25 permanent, shelter pits fronting on the .8-mile straightaway. Directly behind the pits are twelve shop areas so that mechanical work can be done right on the course. A spectator bridge is provided across the straightaway and beautiful cantilevered, pillarless grandstands on the straight, right in the middle of the race complex, provide seating for 7,000."

Jerry thinks his design of the only integrally designed race track in the world would also be the safest. "I can foresee that this course could have a safety record better by far than any other track in the world. We have covered every possible danger area. Courses before haven't been able to do this because they're designed a piece at a time with no unifying concept—everything is just added on as the need is felt."

To the racing novice, Jerry's planning does seem to have covered everything, and the experts seem equally impressed. The plan has support from all areas of the racing field—the Memphis Karting Association to the Federation International de l'Automobile in Paris. Even the city fathers show an interest in more than the economic boost such an attraction would give the area—it would provide a safe place to train Tennessee policemen in high speed pursuit driving.

Tigers Go Into Tech Game With 2 - 2 Record

HYATT HAULS THE MAIL—Freddie Hyatt, better known for pass catching, shows his mettle as a runner in this reverse play in the third quarter of the Wake Forest game. Auburn went on to

score and down the Deacons, 14-6. Convoy duty is by Senior QB Joe Campbell (18). In rear, Forrest Blue (50).

Frosh Bow 20-0 In Opening Game

Florida's freshmen used big breaks to hand the Auburn frosh a 20-0 loss in the season opener for both teams at Gainesville on October 8.

With the score 0-0 in the first quarter, Auburn's Louis Priester fielded a short field goal attempt in his own end zone and returned it over 100 yards for a touchdown. However, the play was nullified by a penalty.

Later in the first half Priester tried to field a punt at the Auburn five but couldn't hold onto it and the ball rolled into the end zone, where Florida recovered for a TD and a 6-0 lead at the half.

In the third quarter Auburn overran a short punt and the Baby Gators were able to return it to the Baby Tiger 40, where

the victors started a TD drive.

In the final period Auburn was called for roughing the kicker on fourth and long yardage and that enabled the Baby Gators to maintain possession. Then at the Tiger 25 Florida tried a pass into the end zone, but Auburn was guilty of interference and the Baby Gators had a first down at the AU one.

They scored in two plays for the points that made the score 20-0.

Coach Tom Jones next sends the freshmen against Georgia's Bullpups here on October 24. On November 7 Mississippi State is the opponent here. Both are Monday games starting at 1:30 p.m. The freshmen close the season in Tuscaloosa on Nov. 19 at 2:00 p.m.

Shug's Letter

Dear Alumni:

This is the first opportunity that I have had to communicate with you since the season began.

In losing two ball games and winning two, we were definitely outclassed with the University of

Jordan

Tennessee. We had hoped to make a much better showing; however, the Vols are a real good football team. We were disappointed in our loss to Kentucky in Lexington, and we still feel that we had a much better football team than was indicated.

Things indeed look ominous and dark as we enter the stretch run of the last six games. Four of these six teams are either in the top ten in the nation or real close to it.

Injuries to Tom Bryan and Marvin Tucker have hurt us a great deal as they are two fine football players that we need desperately.

We will continue to work hard and make every effort to improve from week to week.

With best wishes,

Sincerely,
Shug

logy from Texas Christian University.

* Capt. Leon T. Scarbrough, Jr., is an instructor pilot at Reese AFB, Tex.

BORN: A daughter, Gail Carol, to Mr. and Mrs. Charles Thomas Hyle (Nancy Stallings '62) of Houston, Tex. on February 23.

On the eve of the traditional game with Georgia Tech Auburn's football record stands at two wins and two losses. After Tech the Tigers will meet TCU in a Homecoming high-

light before taking on four straight conference foes—Florida, Mississippi State, Georgia, and, after a two-week gap, Alabama.

After being stunned by Tennessee 28-0 in Birmingham and losing a frustrating 17-7 game at Kentucky, Auburn hammered out a 14-6 win over Wake Forest.

Tennessee 28-Auburn 0

Tennessee missed a field goal attempt after marching some 60 yards with the opening kick-off, but when punter Tommy Lunceford fumbled the snap four plays later, Tennessee was back in business at Auburn's 16. The Vols scored two plays later on a 19-yard Warren-to-Denney pass. Auburn's defense choked off three other Tennessee threats to trail 7-0 at the half.

Early in the third period Auburn drove from their 18 to the Vol 43 but a third-and-seven play fell short and Auburn punted. Just into the last quarter Tennessee capped a 65-yard drive with a short plunge to lead 14-0. Two quick scores in the fading minutes added insult to injury as the Vols got their revenge for winless years since 1960. A Warren-to-Denney pass capped a six-play march after recovery of a fumble at Auburn's 39. Moments later the Vols got a wild pitchout at the Tiger 20. It took four plays and a Galiffa-to-Dalton pass for the final score.

Kentucky 17-Auburn 7

Auburn showed a much more consistent rushing game than against Tennessee but Lady Luck turned her head every time Auburn needed her. Kentucky used all of the Tigers' misery for 17 points. Spending most of the first

quarter offsetting Kentucky punts, Auburn finally moved 4 yards in eight plays before being forced into a field goal try at the 28. Jones' kick hit the crossbar and bounced the wrong way, an omen of what the night held.

Kentucky slashed back and took a 3-0 lead early in the second quarter on Chuck Arnold's 35-yard field goal. The aroused Tigers then marched 79 yards, Bryan scoring from two yards out. Jones converted. Plagge broke loose for a 53-yard sprint, key play in the drive. Minutes later Auburn was back to the Wildcat 25. Then came a wild play that reversed the game's trend. Jones' field goal try was blocked by Lyons and scooped up by Van Meter who streaked for the distant Auburn goal. Running at full speed he dropped the ball at the Auburn 15. Joe Campbell was in such close pursuit that he overran the ball and Van Meter scrambled back to recover at the 13. In five plays Kentucky scored and led 10-7. Auburn came back for another missed field goal try as the half ended.

Early in the third period, Kentucky punted short and the ball hit the foot of an Auburn blocker, Kentucky recovering at Auburn's 23. Beadles passed 21 yards into the end zone. Kentucky converted and went to 17-7. Auburn then stopped Kentucky's longest drive and moved from their 9 to the Wildcat 29 with second and eight, but the drive fizzled. Two Kentucky marches dominated the remainder of the last quarter.

Auburn 14-Wake Forest 6

Back in the friendly confines of Hare Stadium, Auburn mounted 60-yard marches in the first and fourth quarters to overcome a stubborn squad of Demon Deacons. Offsetting promising performances by newer players were knee injuries to Fullback Tom Bryan and Guard Bill Braswell who were doubtful performers for the Tech game at press time.

After swapping fumbles in the opening minutes, Quarterback Larry Blakeney plunged over from the 1 to cap a 16-play, 66-yard march. Jones converted. In the next quarter, after swapping interceptions, Wake Forest with 1:13 left broke Halfback Andy Heck for 52 yards to the Auburn 10. They scored on a pass from the 7. Bobby Beard, who had overhauled Heck, spoiled the Deacons' pass for a two-point conversion with a tackle just short of the goal.

In the third quarter after two drives were thwarted by Wake Forest interceptions of Carter passes, Joe Campbell took a turn at quarterback and directed a 60-yard drive. Blakeney came in to throw an eight-yard scoring pass to Dwight Hurston. Jones converting. Remaining play was highlighted by Lunceford's 64-yard punt to the WF 21. Late in the game Jones was wide with a field goal try from the 27.

Cross Country Season Promising—

Auburn Sweeps Tech 15-40

Auburn started its cross-country season with a shutout 15-40 victory over Georgia Tech in Atlanta, Oct. 10. The decisive win boosted Auburn's chances of improving on last

year's 3-1 record.

The Tigers' Vic Kelley was the first runner home. The Birmingham sophomore ran the 4.4 mile course in 22:43, which was 20 seconds better than Auburn's winning time over the same course two years ago.

Following Kelley across the finish line were Captain Glenn McWaters, Morris Williams, Louis Von Hermann, and Ralph Blaine. In cross-country meets points are scored by each team's first five men to finish, with the first finisher scoring one point; the second, two, etc. Low score wins, and 15 thus is a perfect score.

Coach Rosen's squad faces one of its sternest tests Oct. 17 at the University of Florida. Other meets on the schedule: Oct. 22—Callaway Invitational at Pine Mountain, Ga.; Oct. 28—FSU, here; Nov. 4—NCAA Regional, Pine Mountain, Ga.; Nov. 7—Alabama, there; Nov. 14—SEC Meet, Birmingham; Dec. 10—Troy Invitational.

'Pay-As-You-Play' Is Soccer Motto

"Pay-as-you-play is the plan we operate on," said Sandy Purdon, player-coach of the Auburn Soccer Club.

Although soccer is not a varsity sport, Auburn recognizes the Soccer Club. The university, however, does not finance the team. Members buy their own uniforms, furnish their transportation and pay their expenses.

Auburn opened the fall soccer season of seven scheduled games by tying Maxwell AFB, one of the top teams in the southeast, 3 to 3 on October 1. The team tries to schedule two or more games with each opponent during a season (there are two seasons, one fall quarter and the other spring). Opponents for the fall season are Georgia Tech, Tennessee, Maxwell AFB, and the Birmingham Soccer Club.

The 25 Auburnites in the club are from various parts of the

globe. The first string players are: Pat Wagner, goal keeper; Juan Bonilla, left fullback; John Wilde, right fullback; Noori Saidi, center fullback; Dennis Allen, right halfback; John Allen, left halfback; Jurgan Arndt, left wing; Jim Buckwalter, left inside; Sandy Purdon, center; Jim Demopolis, right inside; Orlando Heilbron, right wing. During its short history the club has had members from Germany, England, Greece, Syria, Costa Rica and other countries as well as the United States.

Purdon pointed out that soccer is played by more people throughout the world than any other sport, but it is relatively unknown in the Southeast. He added, "The advent of a professional team in Atlanta should popularize the sport in the South and boost its support at Auburn."

'Football Preview' Has Blake As Host

George Blake '47 is new host for Auburn Television's Football Review, a weekly program bringing fans a scouting report on the team Auburn plays.

Blake, a professor of zoology, replaces Bill Dorne who joined the faculty at Florida Atlantic this fall. Football Review includes filmed highlights of last season's games, interviews with coaches, and a brief visit to the opponent's campus.

The program may be seen each Thursday at 8 p.m. on ETV channels 2, 7, 10, 25, 26, and 42.

Lewis, Jr., on August 20. They live in Birmingham where Arthur is a senior at the University of Alabama Dental School . . .

'Her Boys' Join In Greetings!

Mrs. Terrell To Mark 100th Birthday

by Kaye Lovvorn '64

Petite, lively Mrs. L. A. Terrell is looking forward to a big party at Auburn's Saugahatchee Country Club on October 27—she'll be celebrating her hundredth birthday! Behind a twinkle and a smile, Mrs. Terrell hides a vast knowledge of sixty years of Auburn University students (her boys) and the town.

She came to Auburn in 1902, bought a huge old colonial home, and began renting rooms to Auburn boys, many now holding prominent positions all over the world.

Auburn was quite different place in those days—dirt streets, 300 students, no electricity, no gas, and very few telephones. However, one thing has remained constant—the railroad just across the street from her house where, until recent years, she could catch a train to Opelika at two in the afternoon and another home at 5.

For many years, she knew everyone and "almost every pig track" in town, but that is no longer true now that the University has exceeded 12,000 and faculty and staff have grown accordingly. However, her circle of friends and acquaintances is envious. She laughs as she says that

dren, Susan 3, and Russ, 10 months.

Tim M. Jenkins completed four years with the Navy in August and is now working toward a

(Continued on next page)

someday she may meet people "all dolled up" in a receiving line and then fail to recognize them later looking "everyday."

An Active Club Woman

Although she remembers episodes 90 years ago, Mrs. Terrell lives very much in the present. One of the most active club women in Auburn, she has no time to be bored. There are meetings of the United Daughters of the Confederacy, The Auburn Woman's Club, the DAR, Perry Garden Club, and the Harvesters Club.

A Chambers County native, Mrs. Terrell returned to Auburn when her physician husband died and she was left to rear and educate their three children. So she moved to the spacious home, now more than 100 years old, on North Gay Street.

Her three children are all Auburn graduates. Her older daughters, Annie Elizabeth '14, is the wife of Dr. C. A. Basore '14, retired head of the Chemical Engineering Department. The Basores live next door to Mrs. Terrell. Another daughter, Hassie Earl '15 (now dead) was the first woman at Auburn to make Phi Kappa Phi, Auburn's highest honorary. Her son Phillip '17 is

a retired vice president of Copperweld Steel Co., now living in Linden, Va., and he'll be in town for his mother's birthday celebration.

Full of delightful stories of her childhood and Auburn's earlier years, Mrs. Terrell recalls starting to school on her fifth birthday with new books from Burton's Book Store in Opelika. This store later became Auburn's Burton Book Store, a community landmark for more than 50 years, when college officials suggested the establishment of a book store here.

A Class At Vanderbilt

Later as a student in Dr. Price's School for Young Ladies in Nashville, Mrs. Terrell was in the first group of coeds to go over to Vanderbilt University for a class—properly chaperoned of course.

Constant throughout her years has been Mrs. Terrell's love of people. For more than 50 years, except for a short while during WW II, she had 15 to 25 boys in her home and a cottage in the yard. Only in 1954 did she stop serving meals. And her boys have remained a major interest in her life as she has followed their careers and "adopted" their wives and children.

A wonderful juxtaposition of the traditional South and the modern, Mrs. Terrell is a vivid example of her belief that "your body may age but you stay young inside"—and that's what counts!

ALUMNI ON EXPRESSWAY—The public relations program for Birmingham's Red Mountain Expressway, conducted by Luckie & Forney, Inc., received feature coverage in the September 8 **Engineering Record**. The Birmingham advertising and public relations agency has conducted a program to ease problems rising out of the road-building project of Harbert Construction Corpora-

tion. Auburn Alumni are playing an important part in both portions of the project. From left, R. Henry Shine '44, director of industrial marketing; Luckie & Forney; John M. Harbert, III '46, president of Harbert; and Amasa Smith, Jr., '60, art director for Luckie & Forney, discuss the project's progress with Walter Morris '57, project engineer for the multi-million dollar job.

Associates Honor L. L. Sellers '29

Vocational agriculture teachers from Southeast Alabama honored their district supervisor, L. L. Sellers '29 at a banquet August 31 in Daleville in recognition of his service to vocational agriculture.

It was a big surprise for the red-haired Sellers who is beginning his 30th consecutive year as supervisor of the Southeast Alabama district.

Among those present were Dr. R. E. Cammack '16 retired director of vocational education; J. F. Ingram, the present state director; T. L. Faulkner, '42 (M.S.) state supervisor of vocational agriculture; and State Representative Pete B. Turnham '44, a former student of vocational agriculture and a member of the FFA.

Cammack, Ingram, Faulkner, and Turnham all took turns on the program and remarked on the many contributions Sellers had made to vocational agriculture in Alabama.

Designated teachers from the eleven counties comprising the Southeast district also had their say in praising Sellers.

J. L. Parish, '39, vo-ag teacher at Geneva, presented Sellers a \$150 life membership in AVA (American Vocational Association). It was a gift from the teachers who make up the district association of teachers. H. H. Montgomery '50, (M.S.) vo-ag teacher of Columbia, is district vice-president of the group.

Sellers was born in 1908 at McKenzie. He graduated from high school there in 1925 and went on to Auburn for his B.S. degree in 1929. Ten years later he had earned his master's degree. Starting as a high school teacher, he became a supervisor in 1937. Since that time, he has served in many capacities, two years as acting state supervisor of vocational agriculture (1956-57). He holds membership in numerous professional and honorary groups.

burn University Agricultural Experiment Station.

Forage crop breeding has received major emphasis in Dr. Donnelly's research at Auburn, and he is nationally recognized for his contributions in the field. His basic studies with vetch led to development of a new vetch variety, which he named Warrior, that made possible commercial vetch seed production in the Southeast. Dr. Donnelly has perfected vetch hybrids that will successfully reseed in summer grass sods to provide grazing while the grasses are dormant.

New interest in sericea has resulted from Dr. Donnelly's persistent work with this poor land crop of low forage quality. Dr. Donnelly was a member of the Auburn plant breeding team that perfected Regal ladino clover, a new variety that maintains stands through hot Alabama summers.

A native of Birmingham, Dr. Donnelly received his B. S. degree from Auburn University in study was interrupted by four years of Army service during World War II. He completed his master's degree at Auburn in 1948 and received his doctorate three years later from Cornell. He has been on the Auburn faculty since 1951.

Six Alumni Figure

In Assignments

By Textile Firm

Recent promotions and new assignments for personnel of Fairfax Mill of the Consumer Products Division, West Point-Pepperell, Inc., include six Auburn graduates.

Douglas G. Hodnett '57 and Robert W. Holley '63 have received special assignments in New York City. The other graduates, Richard A. Beaird '60, R. Leslie Wilkerson, Jr., '41, Lanny L. Bledsoe '54, and Thomas B. Bramlett '43, received new assignments at the mill in Fairfax.

Hodnett will become production coordinator for the Martex towel line. With Fairfax Mill since 1951, he has served in the production office in various capacities.

Holley will be cost supervisor for the Fairfax towel line. He has 19 years of continuous service with the company, serving at several mills.

Beaird has been named finishing mill production manager at Fairfax, succeeding Mr. Hodnett. He has been with the Fairfax Mill for 16 years. From 1957 until 1960 he participated in the company's textile scholarship program, and received his B. S. in textile management from Auburn in 1960.

Management of the mill's carding, spinning, and yarn preparation operations has been realigned to include four overseer positions, three of which have been filled by Auburn graduates. Wilkerson, who has been with the mill since 1939, will continue as overseer of the carding department. Bledsoe has been named overseer of spinning; and Bramlett will continue as overseer of twisting and winding.

Furniture Makers Tap McTyeire

(Condensed from a story by Bob Hawkins in the Birmingham News)

Birmingham businessman William W. McTyeire '36 was surprised the other day when his 285 employees gathered around to congratulate him. Unknown to him, the National Association of Furniture Manufacturers (NAFM) had elected him as new president of their 32,000 member organization.

NAFM officials say to understand Bill McTyeire you take the creative ability plus the wit of the Irish, add the business acumen and energetic persistence attributed to the Scot and mix with inspirational leadership, in just the right proportions, and there you have him!

Proof of the recipe's success is Mr. McTyeire's rise to the head of the organization of America's third largest industry—a monumental triumph. As president of Birmingham Ornamental Iron Co., his segment—casual furniture—of the industry represents only a fraction of the furniture-making complexity.

When Bill joined the company in 1949 it was mainly "miscellaneous metals" but also produced a slow-selling line of casual furniture. When he became president in 1957, the company's

auditors warned him to "either get in or get out of the furniture business, preferably get out." He "got in with both feet," and introduced the Meadowcraft line—named after the founder of the firm, Bert M. Meadow. Meadowcraft has become one of the foremost lines in the casual furniture field.

From 12 employees in the furniture division, the payroll stretched to 285 and production increased from one to 70 per cent of total company sales. Though "miscellaneous metals" is the lesser part of the business now it seats spectators at Atlanta Stadium and a new section at Legion Field. The "trees" at IBM's World's Fair exhibit were precision made at McTyeire's plant.

Almost everyone is familiar with his furniture having seen it on the television shows "Concentration" and "The Price Is Right." Esther Williams' swimming pool advertisement features

the star in a leggy pose on a Meadowcraft chair. Before they split up, Lucy and Desi made eyes across a McTyeire cocktail table.

A mechanical engineer by profession, Mr. McTyeire refuses to live in retrospect. He is well aware that times change and so do furniture styles, so he is continually sketching new designs to catch the buyer's eye.

Calling the furniture industry the "last stronghold of free enterprise left in the United States today," Mr. McTyeire says, "More than 90 per cent of the manufacturers are small-volume producers and many are family corporations. He feels, however, that even the family corporation is slipping from the American scene, driven to "selling out because government restrictions and regulations become too laborious for them to cope with."

Mr. McTyeire has an unusual and a wholesome affair going between his business and his employees. One-third of all profits, before taxes, is distributed to the workers.

Very civic-minded himself, the boss is proud of his employees. They hold a record for participation in the Red Cross program, have contributed more than \$10,000 to the Crippled Children's Clinic, and United Appeal has counted Birmingham

HEADING NATIONAL FURNITURE MANUFACTURERS—New president of the National Association of Furniture Manufacturers is William W. McTyeire '36, shown above at his Birmingham Ornamental Iron Co. His election is a distinct recognition for his company specializes in casual furniture, a small segment of the furniture industry. He became president of the company in 1957.

Thomas Authors Recent Article

After making **Alumnews** history in March as the last and fifth child in his family to graduate from Auburn, 2/Lt. James C. Thomas '66 is back in the news. Lt. Thomas wrote an article, "The Computer Center," which was published in the July issue of **The Military Engineer**, the journal of the Society of American Military Engineers.

Col. Robert B. Marshall, head of the Auburn ROTC, said it "is most unusual for a second lieutenant to have an article published in this magazine."

After graduation, Jim worked briefly for the photo products department of DuPont while waiting for an assignment to the engineers officer basic course at Ft. Belvoir, Va. Completing that course he was assigned to the 4th Engineering Battalion and is currently serving with that group in Vietnam. Jim's wife is Laurie Butler '65.
